-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 5-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Strand in view of Goldstein.

Strand discloses a device comprising: a rail foldable support legs (16) supporting the ends of said rail, said support legs being hinged to the bottom of said rail and foot members (22).

Strand however fails to disclose the feature of his rail member having first and second rail sections one having a male end and one having a female end. Goldstein teaches male female interconnections (see Fig. 3).

Given the teaching of Goldstein the examiner notes that it is obvious and that it would have been well known to one of ordinary skill in the art to provide a connection between to section of a single rail of a balance beam such as the balance beam of Strand for the purpose of providing a device which requires advanced skills in using.

As to the device including foot plates and said foot plates being foldable the examiner note that plates us the current feet of Strand are obvious and known and to provide the feet as being foldable would have been obvious in view of the foldability of other component of the device such as the foldable leg, foldable feet would make the device even more portable.

Art Unit: 3764

In regard to claim 3 and 4 broadly claimed element 108 in combination with element 110 can be considered as a bracket.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Note the bracket (53, 55) and (35, 37) of Lahmann.

Note the male female connection of Keats Fig. 3, and the male female connection of Goldstein.
